## Protect the things you cherish.

You may not spend too much time thinking about your roof. But, take a moment and think about what your roof protects - your family, your home, your prized possessions. They depend on the quality of the roof over your head.

You can confidently select Malarkey Dura-Seal™ shingles. For over four decades the Malarkey family has been manufacturing roofing products to protect families just like yours.

Malarkey Dura-Seal shingles are constructed using Malarkey fiberglass mat. Fiberglass shingles, unlike organic felt based shingles, will not absorb water. That means that Malarkey fiberglass shingles resist blistering, curling and buckling in a way no organic shingle can.

Further, Malarkey Dura-Seal shingles carry a Class A Fire Rating. This is the very best fire rating achievable! So, not only do Malarkey Dura-Seal™ shingles protect your family from the weather, they also offer better fire protection than organic shingles or wood shake roofs, which traditionally have the worst fire rating (Class C).

Malarkey uses only 3M™ colored roofing granules, which have been the standard of quality and performance for the last 50 years. Unique non-porous rock is coated with long lasting colored ceramic to provide the finest barrier to the harmful UV rays of the sun.

Colorfast coating provides years of long lasting color to enhance the look of your roof. The proper selection of color is very

important to the overall appearance of your house.

A roof that matches the exterior color of your home will make a low profile house appear larger and taller. The use of lighter exterior colors also promotes the appearance of largeness.

A pleasing effect can be obtained by installing a dark, vibrant Malarkey roof to contrast with exteriors that are light in color. This enhances the feeling of a low modern outline.

Blend the tones of your siding, windows, trim and roof, and you will increase the apparent size of your home, especially when you select lighter tones.

As you consider your new roof, consider what you are protecting. Select Malarkey Dura-Seal fiberglass shingles for the beautiful protection of the things you cherish.

Malarkey Dura-Seal™ 20 and Dura-Seal 25 Shingles meet or exceed the following technical standards:

- Class "A" Fire Rating
- ASTM D 3018 Type 1
- ASTM E 108 Class A
- 20 or 25-year Limited Warranty
- Wind Resistant
- ASTM D 3462 as manufactured\*
- CAN/CSA A123.5\*
- ASTM D 3018 Type 1\*

\*Dura-Seal 25

Note: Sample pieces or photographs of shingles may not accurately represent the true color level or variations of color blends that will appear on the roof. Before installation, five or six shingles should be laid out and reviewed for conformity to desired color level. If color levels are unsatisfactory, advise your dealer before proceeding with installation. Colors and specifications subject to change without notice. Limited warranties carry terms and conditions. Contact your nearest Malarkey source for further information. Front Photo: Ronald McDonald House of Portland, Oregon.
